

D E Plant Limited drive forwards with MAN and MAN Financial Services.

D E Plant Limited are bitumen spraying specialists for Highway resurfacing works. The company operates Nationwide and covers contracts all the way from the M25 Dartford Crossing, to areas on the M1, M6, M11, A14 and the TFL network.

D E Plant Limited also played a key part in bringing improvements to the Heysham bypass and the new Kingskerswell bypass.

Following their recent investment in two new MAN vehicles, we caught up with Scott Emmett to ask him a few questions about his decision and the future plans for the family run business.

What made you decide to invest in MAN?

The specification and quality both inside and outside the truck outweighs other competitor vehicles we currently have in our fleet, going forwards, we would choose MAN Trucks every time.

We have been looked after by MAN Truck & Bus Bedford brilliantly, from clear and precise updates to the service and aftercare which has been top notch.

Why did you choose MAN Financial Services?

MAN Financial Services offered us the best rate and on top of this there was no waiting around, something we have experienced with other lenders.

The customer service from Roger Millar has been fantastic, even now, after our agreement has been finalised, if I have any queries I know I can pick up the phone and he will offer some sound advice.

Where are D E Plant Limited heading next?

D E Plant Limited is an expanding business; we are aiming to invest in more Bitumen Spraying machines and continue to look onwards and upwards into different ventures.
