Availability depends on model

YOUR DIGITAL FLEET MANAGEMENT. MAN DIGITALSERVICES.

With our digital services, you can make your business processes simpler and more transparent. For example, they facilitate the reduction of your fuel and energy consumption as well as planning and administration of bus servicing work, time management, and much more.

Our digital services are perfectly matched for both diesel and electric technology. Ultimately, MAN DigitalServices help to increase your vehicles' uptime and further improve the efficiency and profitability of your business.

MAN DigitalServices provide support in the following areas:

- Vehicle tracking and route planning
- Tachograph and time management
- Economical driving
- Maintenance and repair management
- Driver assistance
- Charging and battery management
- Data management

The availability and scope of the services depend on the vehicle model. Under certain technical conditions some services are also available for vehicles from other manufacturers. The scope of services may be lower in this case.

MAN
DIGITAL
SERVICES

**TEST NOW
FOR THREE
MONTHS FREE
OF CHARGE!**

Availability depends on model

TRIAL RUN. TEST OFFER FOR YOUR FLEET.

This is the perfect time to seize the opportunity: test MAN DigitalServices now for three months free of charge! Our test offer* applies to the following paid digital services: Geo, Compliant M, Timed, Perform and MAN ServiceCare M. MAN eManager M is also included in the package for the eBus.

The services MAN ServiceCare S and MAN eManager S remain free of charge. Drivers can also download the MAN Driver App free of charge.

Benefit from:

- Efficient fleet management with digital services that help make your work considerably easier
- Our offer now at zero cost and zero risk – your free-of-charge trial period ends automatically after three months with no further obligation

The test offer* applies to all vehicles** in your fleet within the booking period. Begin straight away: with just a few clicks, you can test the benefits of MAN DigitalServices for your entire fleet – and we are certain that they will win you over.

www.man.eu/marketplace

* Applies to all customers who are not yet signed up to any paid MAN DigitalServices.

** Where technically feasible

KNOW THE VEHICLE LOCATION. EXACTLY, NOT JUST ROUGHLY.

Geo

Geo is a comprehensive digital compass for your vehicle fleet. You have a complete overview and full transparency when it comes to all vehicle locations – for intelligent route planning and optimisation as well as long-term storage of driving history for later evaluation. Locations can be searched for precisely with the 20-second GPS tracking interval.

- Identification of optimisation potential using the 25-month driving history
- More flexibility thanks to individually configurable points of interest and geofences
- Increased transparency thanks to simple sharing of vehicle locations with your business partners via a link

YOU TAKE CARE OF THE BREAKS. WE TAKE CARE OF THE DOCUMENTATION.

Compliant M

Compliant M supports you with the legal obligation to regularly read out and store tachograph and driver card data. Compliant M handles this routine automatically via remote access. The data are stored in the cloud and can be called up at any time. Benefit from our secure corporate card hosting service.

- Increased legal security and time savings via storage and archiving
- More transparency and simple data access

Timed

Timed allows you to view all activities digitally based on driver card data. Driving, rest, break, on-call and work times are presented clearly and archived on the RIO platform.

- Optimised operational planning thanks to to-the-minute transfer of driving activities
- Support in avoiding costly driving time violations

SUSTAINABLY STRONG PERFORMANCE. ECONOMICAL AND SAFE DRIVING.

Perform

Perform* provides a detailed overview of your fleet's operational data, which facilitates comparison and evaluation. Driving services can thereby be assessed without bias and improvement potential can be identified. Perform thus offers support when it comes to reducing fuel consumption, vehicle wear and CO₂ emissions – and therefore overall operating costs, too.

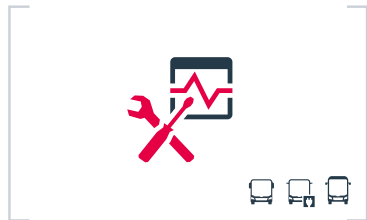

- More efficiency thanks to informative analyses and sustainable driving style optimisation
- Increased security and optimal support for drivers
- Increased flexibility thanks to the provision of operational data for third-party systems via an API

* Only available in full for MAN Lion's Coach and NEOPLAN coaches (excluding model year 2024).
Basic information for all other vehicle models.

WE TAKE CARE OF MAINTENANCE AND SERVICE. YOU HAVE ENOUGH TO DO.

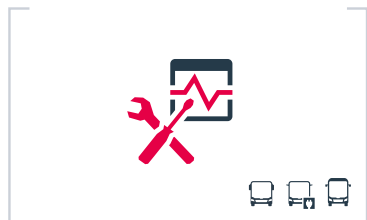

MAN ServiceCare S

MAN ServiceCare S is the free entry point into digital maintenance and repair management for your fleet. Your MAN service outlet informs you proactively about upcoming maintenance work and coordinates the workshop visits with you. With forward-looking planning, appointments can be intelligently pooled. In addition, the nearest MAN service outlet can review relevant vehicle details in the event of a breakdown and provide more targeted support.

- Increased vehicle availability thanks to optimised service condition of your vehicles
- Overview of information relevant to maintenance
- Transparency regarding the condition of the high-voltage batteries in electric vehicles
- Time savings thanks to outsourcing of your administrative workload to your MAN service outlet

MAN ServiceCare M

MAN ServiceCare M includes all the services of the S package, as well as additional functions for added flexibility and customisation. You can always keep an eye on the detailed status of individual components thanks to comprehensive maintenance information. You can also manage your own components. On the due date, you decide whether you will conduct the maintenance yourself or whether you will hand this over to your MAN service outlet.

- All the benefits of **MAN ServiceCare S**
- Increased flexibility and customisation when maintaining your fleet
- Improved transparency thanks to detailed information on maintenance requirements and the battery system in electric vehicles

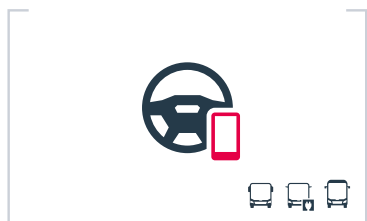

We are already developing MAN ServiceCare with preventive functions so that your vehicles are as fit for service as possible.

ALL-ROUND ASSISTANT FOR DRIVERS. MAN DRIVER APP.

MAN Driver App

The **MAN Driver App** supports drivers with departure checks and damage reports, viewing driving and rest times (Timed), individual driving style analysis (Perform), and with searching for the nearest MAN service outlet. In the event of a breakdown, it is also a quick and reliable contact to our breakdown service MAN Mobile24 thanks to automatic VIN and location transmission.

- Simplified everyday driving
- Access to MAN DigitalServices for drivers
- Networking the driver, fleet manager, MAN service outlet and MAN Mobile24

The use of certain functions requires registration on the RIO platform and the booking of corresponding digital services.

OPTIMISED UPTIME. CHARGING MANAGEMENT MADE EASY.

MAN eManager S

With the **MAN eManager S**, you control your charging management and the prior temperature optimisation of your electric vehicles simply and efficiently. Specify a time when your vehicle or the entire electric fleet should be ready for service using the timer mode in accordance with the driving timetable.

- Improved management of charging processes thanks to a real-time overview of charging status, range and time of complete charge
- Increased range possible thanks to prior temperature optimisation
- More flexibility thanks to location-independent operation and monitoring of charging processes

MAN eManager M

The **MAN eManager M** offers additional functions in order to optimise daily operation and the efficiency of your electric vehicles. In addition to charging management, a comprehensive array of data relating to the battery is available for detailed vehicle and battery monitoring.

- All MAN eManager S functions
- Increased transparency for comprehensive battery monitoring, e.g. data on daily charging and discharge procedures, air conditioning, outside temperature, and energy consumption

AVAILABLE QUICKLY AND EASILY. DATA PACKAGES FOR YOUR MIXED FLEET.

MAN DataPackage S

With **MAN DataPackage S**, you integrate the vehicle data of your MAN fleet into your own IT systems or third-party solutions. Data from the areas cab and comfort, driving behaviour and handling, engine and drive, and safety and environment are transmitted from the vehicle to the RIO cloud via a suitable telematics box and processed. Information relevant to electric vehicles is included.

- Simple data retrieval via API (pull method)
- Transparency through up-to-date vehicle status information
- Support with efficient fleet management thanks to a comprehensive base of information

MAN DataPackage TiGR

MAN DataPackage TiGR follows the TiGR industry standard and integrates vehicle data from your MAN fleet into your own IT systems or third-party solutions. A suitable telematics box is used to transmit and process data from the vehicle to the RIO cloud.

- Automatic data transmission via API (push method)
- Transparency thanks to up-to-date information concerning vehicle status
- Support with efficient fleet management thanks to a comprehensive base of information

THIS IS HOW IT WORKS – SO SIMPLE AND SIMPLY INGENIOUS.

1.

Register on the
RIO platform at
www.rio.cloud

2.

Store vehicles
with an installed
telematics box

3.

Order the desired
digital services

4.

Mobile transfer of vehicle
and maintenance information
to RIO cloud

The portfolio of MAN DigitalServices is integrated into the cloud-based RIO ecosystem. The MAN Marketplace on the RIO platform at **www.man.eu/marketplace** offers you access to the digital services that you can use via a suitable telematics box in your vehicle.

If you have any questions regarding MAN DigitalServices, please contact the MAN DigitalServices experts by telephone on 00800 63444825 (weekdays 8 a.m. to 5 p.m.) or send an email to digitalservices@man.eu

EVEN MORE DIGITAL SOLUTIONS WITH SUPPORT FROM OUR PARTNERS.

Our comprehensive digital services are supplemented by offers from our partners, including:

RIO Exceptions

The free, cross-service add-on

Using the Exceptions function, rules can be set that define when a fleet manager wants to receive a notification. The add-on can only be booked in combination with paid services like Geo, Timed or Perform, which provide the required data.

RIO App Pocket Fleet

The app for mobile fleet management

The Pocket Fleet telematics app keeps an eye on your vehicles and drivers – be it live data, driver activities or availabilities – and processes it all for you in a modern and appealing way.

CO2OPT

The data-based platform for tyre management

Our partner CO2OPT recommends the best tyres for your buses using vehicle and other external data.

- Up to 10% savings on fuel costs and CO2 emissions
- Up to 10% reduction in energy consumption with a simultaneous increase in range (electric vehicles)
- Up to 20% increase in mileage
