

Heathrow Rent A Truck expands with MAN Financial Services.

Heathrow Rent A Truck, a subsidiary company of Mixed Freight Services Ltd, has recently taken delivery of a substantial order of vehicles from MAN.

The order included vehicles from MAN's TGX, TGM and TGL lines.

Year on year, Heathrow Rent A Truck's fleet has expanded due to the rapid demand for rental vehicles in and around the international logistics world and airport operations of Heathrow.

To be able to match demand, the company required a fast and highly efficient finance option; MAN Financial Services provided the stand-out option that suited Heathrow Rent A Truck the best.

The finance plan allowed the company to acquire the vehicles needed in a short, effective timescale.

A large number of the vehicles are now serving the logistic and transport needs of the European leg of the Formula One season. The vehicles have already started their first leg in Valencia, Spain, and will finish up in Milan, Italy, after travelling the road networks of Britain, Belgium, France and Germany.
