

Indipac Logistics Ltd. continues to expand its MAN fleet with MAN Financial Services.

Indipac Logistics Ltd. started as a pre-packaging operation, packing automotive components into individual boxes for onward distribution into the car dealer network. The company is ideally located within easy reach of main routes such as the M4 and M5, in Swindon.

Over time they have expanded their services into many different offerings and now they also perform: Hand enclosing, Heat Shrink packing, Product assembly and dis-assembly, Storage and Warehousing and Fulfilment.

Indipac Logistics' very first HGV was a MAN 7.5tn L200 acquired in 2009, since then they have always stuck with the Brand. Following the latest addition to their MAN fleet, we caught up with Darren Furnell (Director of Indipac) to learn why he decided on MAN Financial Services for their new MAN TGX:

"I felt that keeping everything within the MAN brand would make the process easier, which was the main benefit in using MAN Financial Services"

"The customer service from Simon Footner was Professional, Simple and Comforting"

Indipac Logistics will continue to work hard to ensure they can maintain a steady growth and continue to provide the best service to their customers. They aim to remain agile to come up with new services should the market needs changes.
