

Digital package for the MAN eTruck (eTGX / eTGS)

MAN DigitalServices

Digital package for the MAN eTruck (eTGX / eTGS)

Automatic activation of services on final customer billing.

- **5-year term:** The services are automatically cancelled at the end of the term. If the vehicle is sold before the end of the term, all subsequent owners can continue to use the services free of charge until the end of the term.
- **After the end of the term:** You can extend the services via the MAN Marketplace www.man.eu/marketplace on the RIO platform.
- **Comprehensive package:** The use of a wide range of MAN DigitalServices is included at no additional cost.

* Comprehensive information on the detail pages of the respective services.

Geo – vehicle tracking and extended map functions

Comprehensive digital compass for the fleet

- Overview of all vehicle locations in 20-second GPS tracking intervals
- Route planning incl. estimation of tolls
- 25-month storage of trip history
- Create and manage your own points of interest and geofences

Identify potential route optimizations using long-term driving history

Customer-friendly sharing of vehicle locations via link with client

Simplified control through customizable points of interest and geofences

Compliant M – remote download of tachograph and driver card data

Support for the legal obligation to retrieve and store tachograph and driver card data

- Regular, automatic download and storage of data
- Management of company cards in the card hotel
- Easy data access via the RIO platform – anytime, anywhere
- Quick and easy identification of driving time violations via the analysis portal including detailed violation reports

Increased legal certainty through automated process

Reduced administration and time savings thanks to the card hosting service

Support for avoiding costly driving time violations

Timed – monitoring of driving and rest periods in near real time

Monitoring of driving and rest periods based on driver card data

- Automatic transfer and 90-day archiving of driving, rest, break, on-call and working times on the RIO platform
- Display of data per day, week and fortnight
- Minute-by-minute tracking of driver activity in near real time

Quick insight into driving and rest times

Optimized deployment planning thanks to minute-by-minute transmission of driver activities

Helps avoid costly driving time violations by displaying remaining driving time

Perform – vehicle and driver deployment analysis

Comprehensive usage data in near real time

- Records, analyses and processes vehicle and performance data such as fuel consumption, operating time, speed and driving distance or the use of assistance systems
- Provides data on operational severity (e.g. traffic, road types, environmental data, elevation profile)
- Detailed overviews and reports help identify potential for improvement
- Comparable driver ratings based on different criteria regarding consumption and wear-optimized driving

Greater efficiency and driving safety thanks to improved driving style

Increased efficiency: Reduction in fuel/energy consumption, CO₂ emissions and TCO possible

Basis for individually tailored driver training

MAN SmartRoute – intelligent route planning for MAN eTrucks (eTGX / eTGS)

Smart route planning and charging strategy

- Charging planning that takes account of various parameters such as vehicle profile, remaining range, charging time, eTruck charging power, traffic conditions, topography, and payload
- Display of charging points including detailed information such as number of sockets, occupancy, charging capacity of the charging station; information on truck readiness and price information*
- Future expansion of route planning will include consideration of:
 - tachograph data (driving and rest times)
 - real-time data for dispatchers on the RIO platform and route transfer to the MAN media system for drivers

* when available / in conjunction with MAN Charge&Go

Optimized route planning
and efficient charging strategy
(intermediate charging)

Support for reliable completion
of the driving task

Optimum use of driver
working time

MAN eManager – charging management made easy

MAN eManager S

- Real-time overview of charging process, remaining range and fully charged time
- Location-independent charging control via timer mode and preconditioning

MAN eManager M

- All MAN eManager S functions
- Extensive battery data for detailed vehicle and battery monitoring

Increase in range possible through efficient control of charging processes and preconditioning

Greater flexibility through location-independent operation and monitoring of charging processes

Quick insight into battery status and charging history

**Additional free
MAN DigitalServices**

MAN ServiceCare S – proactive maintenance and repair management

MAN ServiceCare S

- Monitoring and bundling of maintenance requirements and appointment coordination by the MAN service centre
- Overview of maintenance information in MAN ServiceCare on the RIO platform
- Faster breakdown processing with the help of remote vehicle diagnostics

Supports increased vehicle availability thanks to proactive maintenance

Saves time through outsourcing to the MAN service support point

Provides quick insight into the fleet maintenance status

MAN Driver App – digital all-round assistant for drivers

Wide range of valuable information and functions, e.g.:

- Guided departure check and damage report
- For truck drivers:
 - Points of interest finder: petrol stations, parking lots, etc. with MAN SimplePay*
 - Contactless transactions for refuelling and parking with MAN SimplePay*
- Display of driving and rest periods with Timed*
- Individual driving style analysis with Perform*
- MAN Mobile24 breakdown call with VIN and location transmission
- For MAN eTruck drivers: Display of the charging status

The availability of individual functions may vary depending on the vehicle. Under certain technical conditions, the MAN Driver App also supports drivers of other vehicle brands with selected functions. The MAN Driver App can be downloaded free of charge.

Simplifies driver's daily routine

Networking of driver, fleet manager, MAN service centre and MAN Mobile24

Driver access to additional MAN DigitalServices

* The use of certain functions requires registration on the RIO platform and a subscription for corresponding digital services.

MAN Charge&Go – Europe-wide, eTruck-specific charging network from MAN

Comprehensive charging solution for public charging

- Europe-wide, eTruck-compatible charging network for maximum flexibility and range
- Competitive charging tariffs with monthly billing for a simple and clear cost overview
- In conjunction with MAN SmartRoute: Display of MAN Charge&Go charging stations for efficient route planning – via the RIO platform for dispatchers and in the MAN media system* for drivers
- Display of suitable charging points for the driver in the MAN Driver App
- Proven MAN Mobile24 support for all aspects of the charging process

* Route transfer to the media system is expected to be available from 2026.

The MAN Charge&Go charging card can be requested free of charge.

Optimal use of eTrucks through access to a truck-compatible charging network

Competitive prices and simple payment processing

Increased transparency through consolidated invoices

MAN Now – Over-the-air software upgrades

Software upgrades via mobile internet, avoiding workshop visits

For trucks from model year 2020 – features with subscription model:

- MAN OnlineTraffic
- Free initial activation for one or two years depending on the navigation system

Additionally for trucks from model year 2022 – numerous features with one-off payment

Quickly adapt the vehicle to new business requirements

Increase vehicle availability thanks to time-saving transfer and installation

Greater efficiency, safety and convenience depending on the feature

MAN ServiceCare M – proactive maintenance and repair management

MAN ServiceCare M

- All MAN ServiceCare S functions (cf p.10)
- Detailed information on components, fluid levels, etc. for carrying out maintenance and repairs independently
- Professional battery monitoring and analysis for electric vehicles thanks to detailed data
- Management of own components possible

Supports increased vehicle availability thanks to proactive maintenance

Provides quick insight into the fleet maintenance status

MAN SimplePay – efficient cost management and contactless transactions

Platform for fleet operators to view all operating costs for the digitally stored fuel and charging cards for each vehicle:

- Clear presentation of operating costs such as refuelling, parking, maintenance and repair, and much more in MAN SimplePay on the RIO platform. Also for vehicles from other manufacturers
- Contactless authorization of transactions for refuelling and parking at selected acceptance points via the MAN Driver App
- Automatic cost approval in the event of a breakdown, from € 1,500 up to € 5,000 is possible.

To use MAN SimplePay, a UTA Edenred card must be digitally stored in the platform. Contactless transactions are possible at selected acceptance points and countries with our partners UTA Edenred and TRAVIS Road Services and require an Internet connection. MAN SimplePay's partner network is continuously being expanded.

Increased transparency and time savings thanks to a central platform

Improved cost control and identification of potential savings and cases of fraud

Accelerated transaction and breakdown processing

MAN Connected CoDriver – individual driver coaching via phone

Live driver coaching by phone from an experienced MAN ProfiDrive trainer

- Valuable tips for an efficient driving style
- Prerequisite: activation of the “Perform” service

Supports greater economy through consumption and wear-optimized driving

Greater safety thanks to improved use of Safety and Assistance Systems

Increased driver satisfaction through improved driving style and safety thanks to individual tips
