

MAN GENUINE ENGINE REPAIR KITS.

Best quality in a package deal.

Price advantage of
up to 35% compared to
the individual parts.

THE ENGINE – THE HEART OF YOUR MAN VEHICLE.

Trust your MAN service outlet for repairs.

The inner workings of your MAN engine are characterised by a large number of components and therefore enormous complexity. If a repair is necessary, it usually makes a lot of sense to replace the relevant components. This also includes the peripheral parts, which should also be replaced. In total, this may be an additional financial outlay, but individually these parts would be more expensive and considerable costs can be saved in the long term because additional visits to the workshop can be avoided. The use of MAN Genuine Parts Kits also speeds up repair times and simplifies order processing.

Benefit from high standards even with older vehicles:

Even if your MAN vehicle already has a high mileage, you do not have to do without the high quality of MAN Genuine Parts for maintenance and repairs. Because these are available in the form of engine repair kits at particularly favourable conditions.

TAKE US AT OUR WORD.

MAN stands for exceptionally high quality and thus helps to maximise the service life of your vehicle. MAN Service also ensures that parts are fitted quickly and smoothly, so that long downtimes for repair or replacement are generally avoided. Take advantage of these benefits and actively help to ensure that your vehicle or fleet remains reliably operational throughout its entire life cycle.

MAN Genuine Parts support with

- Reliability and safety thanks to MAN Genuine Parts quality
- Shorter workshop visits
- Long-term reduction in operating costs
