

MAN LION'S INTERCITY.

Versatility meets efficiency.

DESIGNED FOR MORE EFFICIENCY.

Flexibility, safety and comfort are the top priority of the MAN Lion's Intercity. At the same time, costs are kept to a minimum.

No matter which application you use the MAN Lion's Intercity for – be it as an intercity coach, school or shuttle bus – the versatile bus adapts flexibly to your requirements and ensures that passengers and drivers feel perfectly at ease. The MAN Lion's Intercity impresses not only with its flexibility and comfort but also with low operating costs. Now also available with the nearly wear-free MAN EfficientHybrid start-stop system, it reduces fuel consumption and lowers environmental impact while delivering maximum performance without compromising passenger comfort.

Powered by a fuel-efficient 9-litre MAN D15 engine, light-weight construction and an aerodynamic design, it ensures high cost-effectiveness and maximum vehicle availability.

When combined with our customisable financing solutions, service offerings, digital services and professional driver training, the MAN Lion's Intercity can help to make your business more efficient.

Your benefits at a glance.

- **Great efficiency** thanks to low-consumption, easy-to-repair and maintain D15 engine and MAN DigitalServices
- **High safety** thanks to intelligent and innovative assistance systems
- **Excellent driving comfort** thanks to digital cockpit and modern passenger area

A **RELAXED** DRIVING EXPERIENCE.

At MAN, we understand that the comfort of both drivers and passengers is essential. That's why the driver's cockpit is designed to minimise strain, ensure intuitive operation, and provide effortless control over all assistance and comfort functions – safe, simple, and reliable.

Every element is carefully arranged to support maximum focus on the road. Displays and operating levels are clearly separated, while controls are positioned within natural reach from a relaxed seating posture – making driving both comfortable and efficient.

Passengers also benefit from thoughtful design. High-quality seats guarantee a smooth, relaxing ride, while the efficient climate system ensures the perfect onboard environment. And with the flexible modular system, the MAN Lion's Intercity can be configured to suit your needs – whether with a change platform, wheelchair lift, luggage racks, travel guide seat, or a wide range of other options.

The result? A vehicle built to deliver lasting comfort, safety, and adaptability – for drivers, passengers, and operators alike.

STAY ON THE SAFE SIDE!

Safety is at the core of the MAN Lion's Intercity. With a comprehensive package of standard safety systems, the vehicle is prepared to support drivers in demanding traffic conditions and provide a secure environment for passengers.

The Electronic Stability Program (ESP) helps maintain control in dynamic driving situations, while the Electronic Braking System (EBS) Plus with integrated ABS ensures consistent and reliable braking. Traction control (ASR) assists on slippery surfaces, and automatic hazard warning lights activate during emergency braking to keep surrounding traffic aware.

In addition, a range of intelligent driver assistance systems work together to ease the driver's workload and enhance overall safety on the road. This combination of technologies creates a dependable foundation for safe and comfortable travel – so drivers can concentrate on the journey, and passengers can ride with confidence.

Adaptive Cruise Control (ACC)

The Adaptive Cruise Control* can automatically adapt both the vehicle speed and the distance from the vehicle in front within predefined settings.

MAN BrakeMatic

The MAN BrakeMatic makes it possible to constantly maintain a speed set by the cruise control or with the brake pedal when driving downhill by automatically controlling the continuous brakes accordingly. This reduces the strain on the driver and increases driving safety. In addition, compliance with the maximum permissible speed is guaranteed.

Emergency Brake Assist (EBA) Plus

The Emergency Brake Assist Plus* detects emergency braking situations and warns the driver in good time. If the driver fails to react, emergency braking is initiated and the ESS (Emergency Stopping Signal) is activated in addition to the brake lights. The hazard warning lights signal the emergency situation to other road users and thus reduce the risk of a rear-end collision.

MAN Driver Monitoring System (DMS)

The system* helps minimise the risk of accidents by detecting the first signs of lack of concentration and overtiredness at an early stage and warning the driver by means of a visual and acoustic signal.

Lane Guard System (LGS)

Using the latest camera technology, the Lane Guard System* helps drivers stay in the correct lane. If your vehicle touches the lane marking or leaves the driving line without indicating, an acoustic signal sounds.

Turn Assist

The radar-based system with active warning defuses critical situations at intersections. Active warning of dangerous situations and imminent collisions is provided visually and acoustically by a warning signal if other road users are in the area of the vehicle's sides, which are often difficult to see, or directly in front of the vehicle.

MAN SafeStop Assist

The system stops the bus if the driver suddenly becomes incapacitated due to unforeseen events such as medical emergencies. It ensures that the vehicle brakes in a controlled manner and can thus help to prevent accidents.

* Within the limits of the system.

MAN DIGITALSERVICES FOR EVEN MORE EFFICIENCY.

Would you like to increase the efficiency of your MAN Lion's Intercity with minimal effort?

Our digital services can help to make business processes more transparent and straightforward while increasing vehicle availability.

MAN DigitalServices can support you in the following areas:

- Vehicle tracking and advanced map functions (Geo)
- Remote download of tachograph and driver card data (Compliant M)
- Monitoring of driving and rest times (Timed)
- Proactive maintenance management (MAN ServiceCare).
- Driver support (MAN Driver App).

Try MAN DigitalServices free of charge for three months!

This offer is valid for all vehicles* in your fleet during the booked period. Get started today!

* This offer applies to all customers who have not previously purchased any paid services from MAN DigitalServices. The range of services available depends on technical availability and may vary depending on the vehicle model.
