

# MAN LION'S CITY 12 E

## Engine

|                  |                                            |
|------------------|--------------------------------------------|
| Type of drive    | Electric                                   |
| Battery type     | Lithium-ion; NMC                           |
| Range            | 380 km <sup>1)</sup>                       |
| Rated power      | Continuous power 160 kW, peak power 240 kW |
| Max. torque      | 2,100 Nm                                   |
| Battery capacity | Up to 445 kWh                              |

## Gearbox

|                              |   |
|------------------------------|---|
| Single-stage adapter gearbox | ✓ |
|------------------------------|---|

## Passenger area

|                    |    |
|--------------------|----|
| 2-door             | ✓  |
| 3-door             | ✓  |
| 4-door             |    |
| Passenger capacity | 45 |

## Dimensions

|                            |                             |
|----------------------------|-----------------------------|
| Length/width/height (max.) | 12,200 mm/2,550 mm/3,320 mm |
| Front/rear overhang        | 2,775 mm/3,405 mm           |
| Wheelbase                  | 6,005 mm                    |

<sup>1)</sup> Depending on the battery usage strategy and under favourable operating conditions: Low operational demands in terms of average speed, loading, topography and air-conditioning.
