

# MAN GENUINE OPERATING FLUIDS.

High quality for your MAN.

# MAN GENUINE OIL. SMALL DIFFERENCE. BIG IMPACT.

The whole has to be better  
than the sum of its parts.

Perfectly aligned components throughout enable MAN Genuine Parts to excel in motorisation and technology. With MAN Genuine Oil, we offer an enhancement for the core components of an MAN vehicle – engine, gearbox, driven axles and transfer cases. MAN Genuine Oils are proven to provide an ideal protection against wear and thus help to increase the vehicle's service life and lower its total cost of ownership (TCO). Only MAN's best oil is good enough for your MAN. MAN Genuine Oil.

## Why you should choose MAN Genuine Oil:

- High efficiency and performance
- Cleaning effect helps to stop sludge forming
- Helps to reduce fuel consumption and CO<sub>2</sub>
- Helps to reduce the total cost of ownership
- The portfolio is being adjusted and extended in light of technical development

## MAN GENUINE OIL.

Many years and millions of kilometres later.

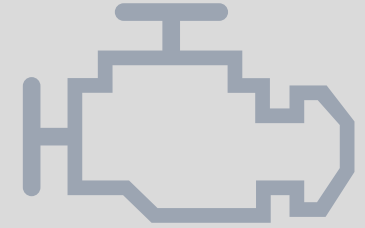

The hardest test is putting it into practice on the world's roads, day after day, month after month. And it is here that the performance of an oil is put to test under real-life, day-to-day stresses and strains: strong vibrations, dirty air, stop-start driving, frequently using the engine brake and much more. Over many years we have tested different types of oil for engines, gearboxes, driven axles and transfer cases in extensive road tests. The components were then disassembled, inspected and assessed by our engineers. If they revealed signs of deposits or increased wear, then the oil in question was not approved. Only the oils that have passed these tests, i.e. that have proved to be ideally suited to our vehicles, receive the MAN seal of approval.

# MAN GENUINE ENGINE OIL

High-performance oil for high-performance engines.

A smooth drive – that alone hasn't been enough for a long time now. Modern engines have to fulfil the highest performance and efficiency requirements as well as have low emissions to help protect the environment. Sophisticated technical components and exhaust gas after-treatment also have to work perfectly and reliably, even under extreme climatic conditions. This can be achieved by using high-quality engine oils that meet the technical and chemical requirements posed by MAN's trucks, buses and vans. In other words, with MAN Genuine Oil quality.

## Your benefits

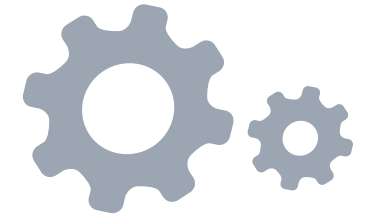

- Service intervals of up to 140,000 km\*
- Service intervals for diesel particulate filters of up to 850,000 km
- Longer service life, even under extreme conditions
- Increased efficiency and performance with minimal oil usage
- Also available in a handy 5-litre canister

\* For MAN D20 and D26 engines

# MAN GENUINE GEARBOX OIL

Helps convert power into performance.

The power inside the engine should go back where it belongs: on the streets. The gearbox is crucial for this. Its perfect functionality allows for maximum efficiency, which can only be achieved with high-quality gearbox oil. Tested especially for use in MAN trucks and buses, MAN Genuine Gearbox Oil meets these requirements extremely reliably even in extreme conditions. Turning power into more performance.

## Your benefits

- High oxidation resistance and thermal stability, even with long intervals between oil changes
- Ideal viscosity for problem-free cold starts and perfect shifting at low temperatures
- Higher gearbox service life even in extreme driving conditions and outdoor temperatures

# MAN GENUINE AXLE OIL

For an ideal distribution of power.

In the engine/gearbox assembly, the driven axles and transfer case are the final components when it comes to power transmission. They also need to work properly for the whole system to reach maximum functionality and efficiency. This requires an oil that is perfectly aligned with technology and that demonstrates these properties reliably even under extreme conditions. MAN Genuine Axle Oil is a tried-and-tested oil that has been proved to have these qualities.

## Your benefits

- Long service life for driven axles and transfer cases even in extreme driving conditions and outdoor temperatures
- High oxidation resistance and thermal stability, even with long intervals between oil changes

# MAN GENUINE ANTI-CORROSION AND ANTI-FREEZE LIQUID

Excellent protection for MAN engines against frost, corrosion and overheating: MAN Genuine anti-corrosion agent and anti-freeze for all truck, van and bus diesel engines effectively prevent corrosion and deposits from forming in the cooling circuit of the engine.

## Why you should choose MAN Genuine anti-corrosion and anti-freeze liquid:

- Protects metals and alloys in the cooling circuit: aluminium, cast iron, steel and brass
- High heat capacity ensures optimal cooling and prevents overheating
- Compatible with sealants and coatings
- Suitable for all engines of all emission levels
- Ready-to-use mixture prevents incorrect use and engine failure

# MAN GENUINE OPERATING FLUIDS ADBLUE®

## To reduce emissions

For a clean environment, AdBlue® for high performance diesel engines helps comply with Euro standards. It is a non-toxic and environmentally friendly product that allows you to reduce exhaust emissions with low costs and little effort.

## Why you should choose our AdBlue®:

- AdBlue® is an effective solution for the aftertreatment of exhaust gases
- Helps reduce emissions and comply with the latest emission standards
- Protects the service life of SCR systems and their efficiency
