

Roborock Qrevo Slim

Slim. Smart. Spotless.

8.2cm Ultra-Slim Design

Slim and Spotless, Everywhere

Roborock Qrevo Slim packs a powerful punch in a sleek, low-profile 8.2cm frame, designed to conquer hard-to-reach areas. It seamlessly glides under sofas, beds, and other low-clearance areas with its advanced locating and mapping capabilities, providing a truly complete cleaning experience.

Pioneering Navigation System

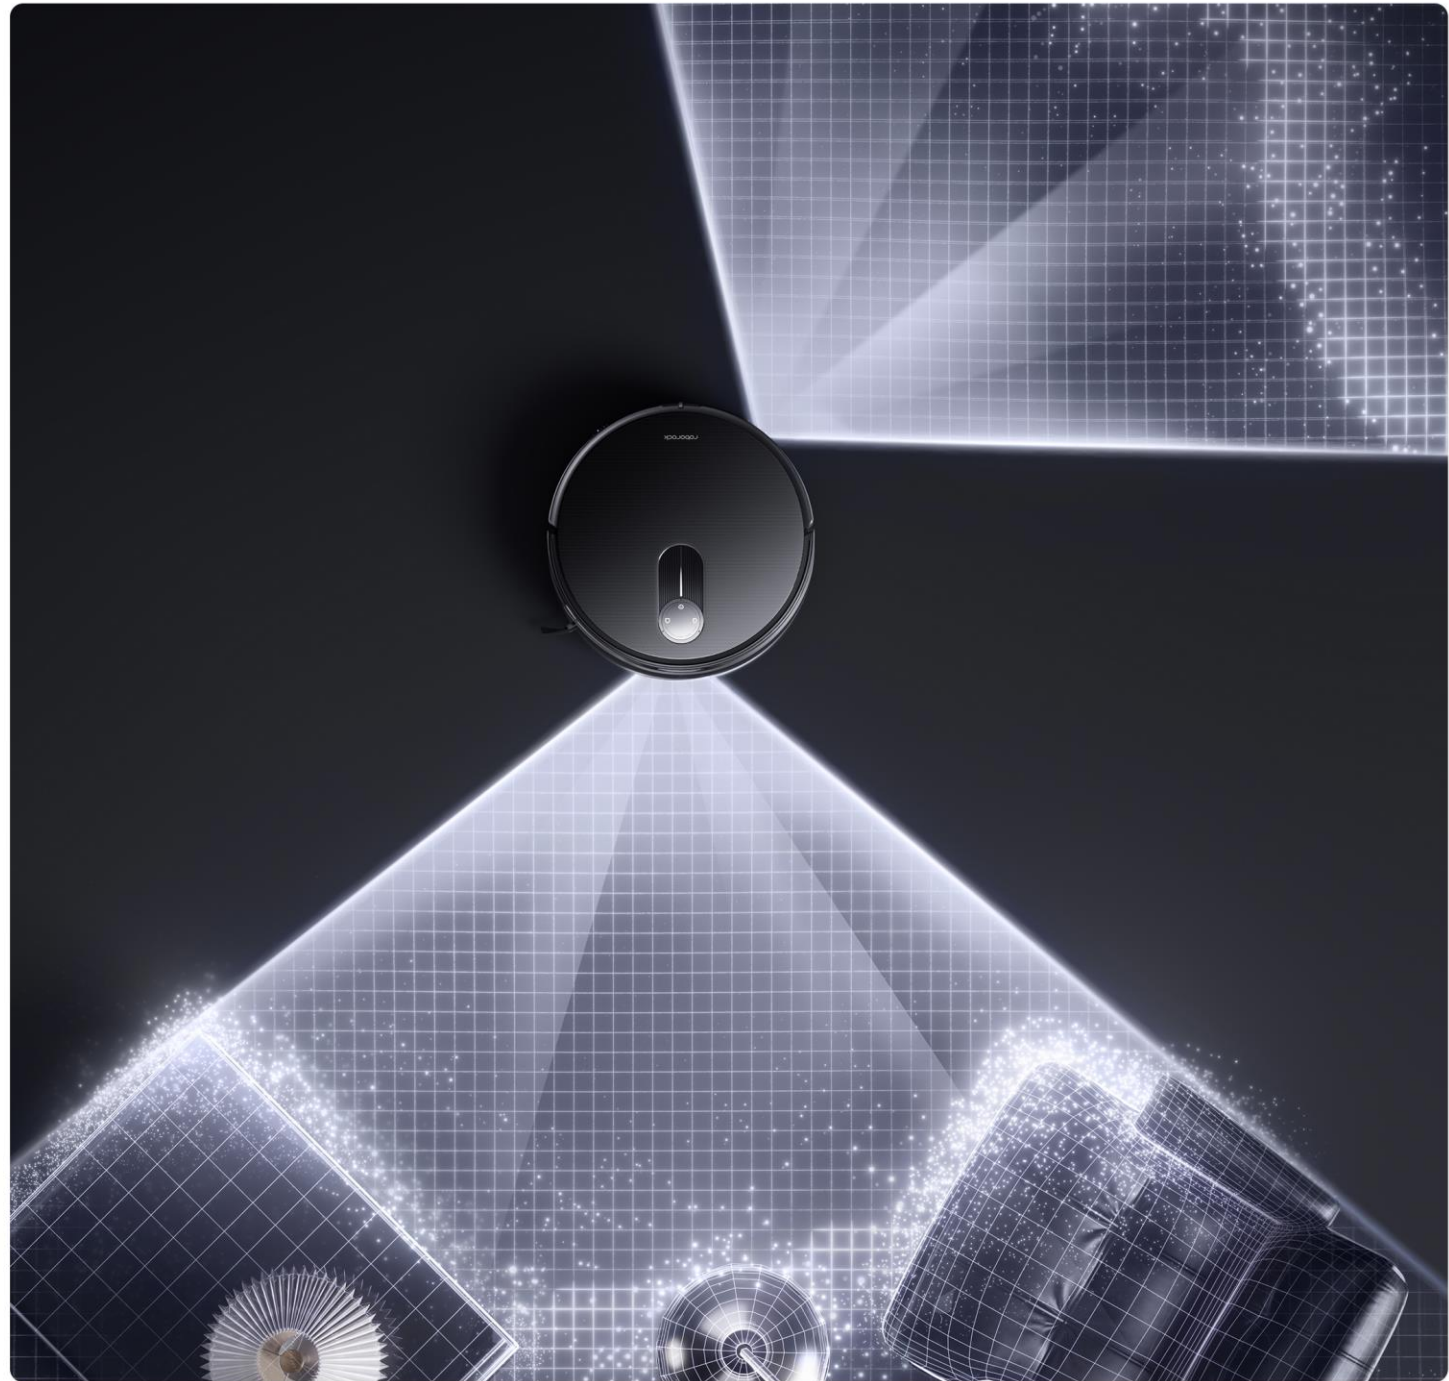

Unlock Next-Gen 3D Sensing

As Roborock's latest cutting-edge innovation, the sophisticated dual-light 3D ToF system provides a comprehensive 3D understanding of the surroundings, enabling the robot to navigate with pinpoint precision and create accurate maps, even in challenging areas like suspended cabinets and furniture with thin legs.

21x

Improved Sampling Frequency*

*Based on internal testing carried out by the manufacturer according to the LDS sampling frequency calculation method.

Advanced Obstacle Recognition

Roam Without a Hitch

Powered by the 3D ToF sensor that captures precise outlines of obstacles and an RGB camera for visual recognition, the robot reacts faster to unexpected obstacles and smaller items. This advanced intelligence allows it to maneuver through your home without any hassle.

>21,600
Sensor Points*

3x
Improved Small Object Avoidance²

73
Types of Objects Recognizable¹

*The Roborock Qrevo Slim uses a QVGA ToF sensor with 21600 sensor points.

1. Based on internal testing carried out by the manufacturer, Roborock Qrevo Slim can see and bypass objects down to as small 3cm wide and 3cm tall. Recognition accuracy may vary depending on environmental factors.

2. Based on internal testing carried out by the manufacturer, Roborock Qrevo Slim can see and bypass square building blocks down to as small 3cm wide and 3cm tall. The recognition accuracy is 3 times higher than S8 Pro Ultra.

FlexiArm Side Brush and Mop

Leave Dirt Nowhere to Hide

The FlexiArm technology empowers double robotic arms for the side brush and the mop to expertly sweep dirt from corners, edges, and under furniture. The flexible system ensures comprehensive cleaning coverage, eliminating blind spots for a meticulous whole-home clean.

100%

Edge and Corner Coverage*

0 mm

Along the Edge and Corner*

*Certified by TÜV Rheinland. Test report number: No. CN24MQ0Y 001. Actual coverage depends on the environment.

DuoRoller Riser Brush

Double the Power, Double the Clean

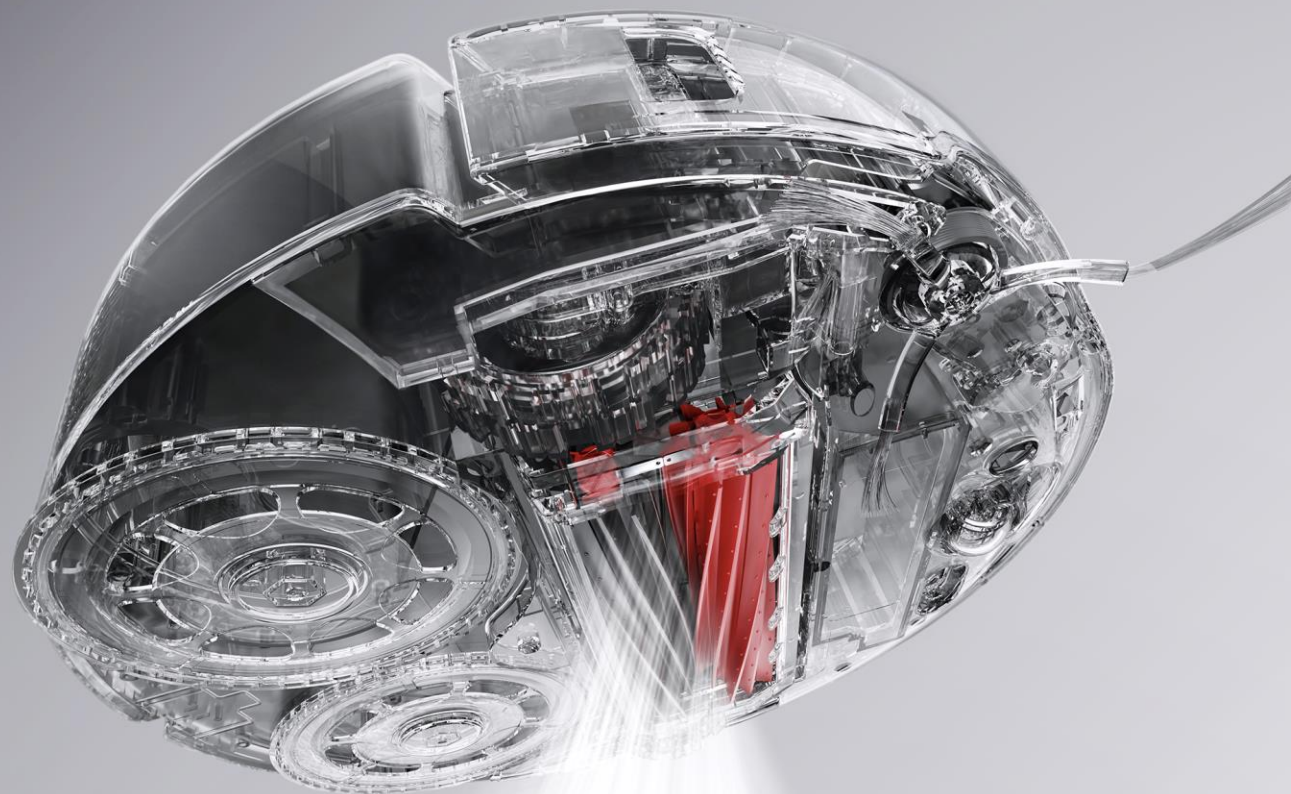

The dual counter-rotating all-rubber brushes and 11,000 Pa suction power make the Roborock Qrevo Slim an outstanding cleaning force. It conquers dirt, hair, and debris across various floor types like hardwood, tile, and carpets for a pristine, flawless finish.

2x

All-Rubber Main Brush

11,000 Pa

HyperForce® Suction*

Less hair tangled with concealed scrapers

*Based on internal testing carried out by the manufacturer according to IEC 62885-2:2021 / 5.11 standards, using Max+ mode with a full battery, the maximum suction power can be up to 11000 Pa.

Roborock Carpet Boost+ System

Tailored for Easy Carpet Maintenance

Get better carpet care with a 99% hair pick-up rate using the Roborock Carpet Boost+ system.

99%

Hair Pick-up Rate on Carpets*

Carpet Boost

Deep Carpet Cleaning

Vacuum Carpet First

*Based on internal testing using Max+ mode. Actual results may vary according to the home environment.

Liftable Brushes and Mops

Designed for a Perfect Clean

The automatic lift capabilities for the brushes and mops optimize performance for different tasks and prevent stains after cleanup.

Brush Lifted

DirTect™ Technology

Adaptive Cleaning Intelligence

—
Dirt doesn't stand a chance as the robot adapts its cleaning strategy based on the dirt type. Heavy dust? It cranks up the suction. Stubborn stains? It switches to mop-only mode with increased water flow.*

*In mop-only and vacuum & mop mode, Roborock Grevo Slim can clean dried stains with increased water flow.

Dual Spinning Mops

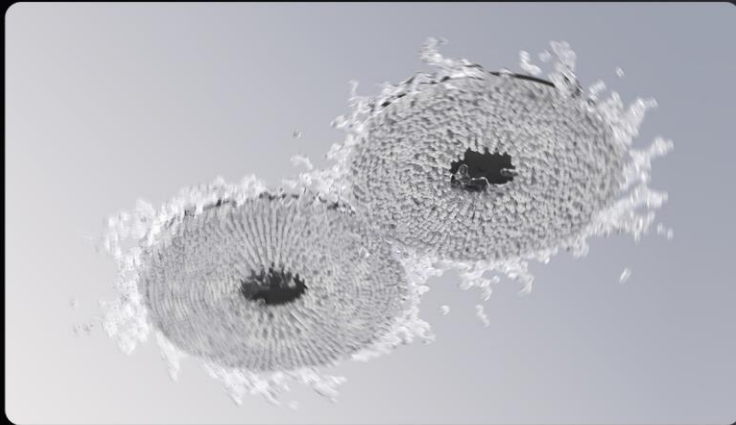

Tackle Tough Stains and Grime

Elevate your cleaning routine with the dual spinning mops. Engineered to glide effortlessly across your floors, the mops apply constant pressure and humidity for a flawless shine.

200 RPM
Spinning Speed ¹

10 mm
Mop Lifting²

30 Levels
Water Flow Options

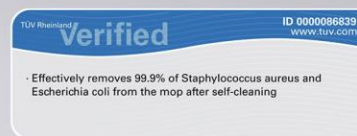

1. Based on internal testing carried out by the manufacturer, when selecting extreme water flow in custom mode, the mops can spin at a maximum speed of 200 rpm.
2. Based on internal testing carried out by the manufacturer, the mop modules can be lifted up to 10mm.

Hot Water Mop Washing

The heated water effectively dissolves greasy stains and removes over 99.9% of bacteria from the mops, leaving your floors in dining areas and kitchen hygienically clean with minimal effort.

99.9%

Bacterial Removal Rate*

*Based on testing carried out by TÜV Rheinland on Staphylococcus aureus and Escherichia coli under default mode, over 99.9% of bacteria are effectively removed at the dock. Test Report number 326030784a 001. Actual results may vary according to the home environment.

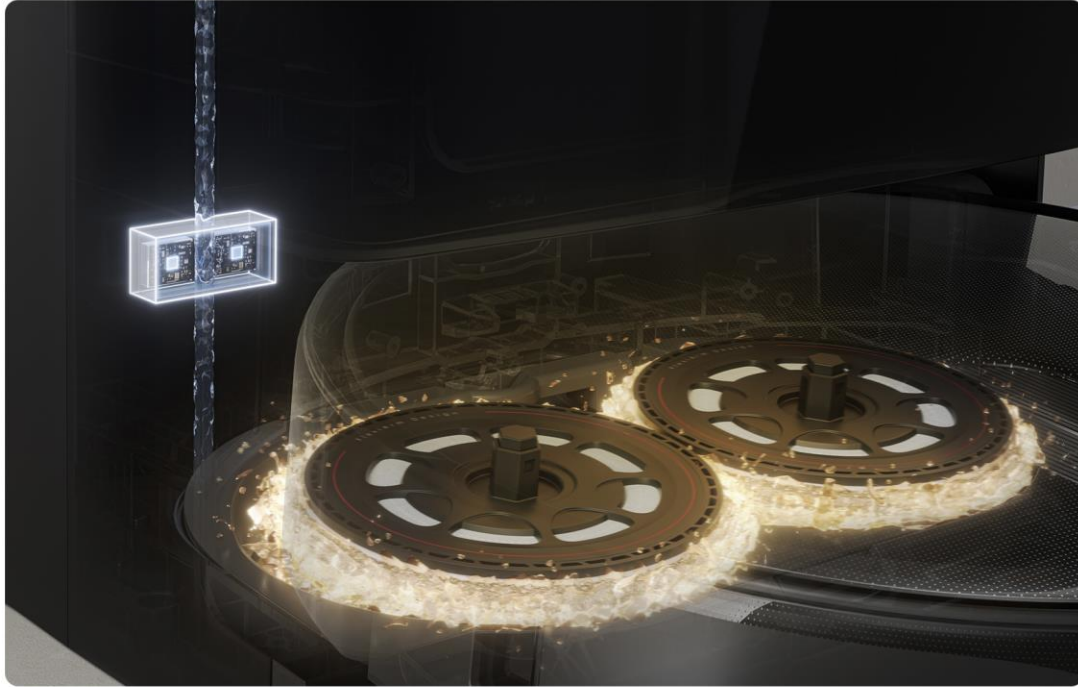

Dock Self-Cleaning

With the motor-driven cleaning module, the dock base is cleaned effectively by rotating scrapers, eliminating the need for manual maintenance. All self-cleaning module accessories and the dock base itself are fully detachable for easy washing when needed.

Intelligent Dirt Detection

For Re-Wash

During mop washing, the system continuously monitors the dirt level to adjust the wash duration, guaranteeing your mops are thoroughly cleaned.

For Re-Mop

For floors with stubborn, heavy soiling, the dock automatically triggers an additional mopping pass to ensure a perfect clean.*

*The automatic re-mopping feature needs to be activated manually in the Roborock App.

Roborock SmartPlan Technology

With SmartPlan Mode on, the Roborock Grevo Slim can handle the entire cleaning process automatically. All you need to do is select the cleaning area, and it will take care of the rest, determining how to clean automatically based on the environment.

Temporary Cleaning

The “Temp Cleaning” function swiftly handles unexpected spills without disrupting your usual cleaning schedule. You can also use the “Temp Skip” feature to bypass cleaning specific areas temporarily.

Custom Cleaning Routines

Personalize your cleaning routine with a preferred time, cleaning mode, cleaning direction, and the areas that need cleaning.

Purrfect Pal for Your Furry Friends 🐾

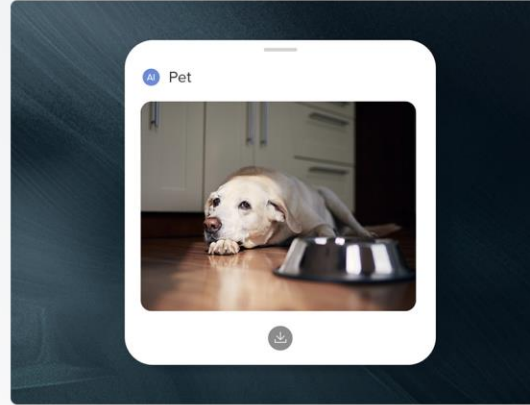

Video Call & Cruise

Whether you need to check in on your furry friends, schedule on-demand cruises, or manually control the robot's patrols, it's all just a tap away.

Pet and Pet Supply Recognition

It stops its main brush and moves aside in advance when approaching your beloved pets to avoid frightening them. And it will boost suction when cleaning around pet supplies for a thorough clean.*

Pet Snaps

Capture those adorable moments of your pets with Roborock Qrevo Slim. While tidying up your home, it can snap precious pics of your pets, readily available for you to download.

Search for the Pet

Are you concerned about your purring pal home alone? With a tap on the App, the robot will roam around your home to find your pet.

*To boost suction power around pet supplies, please activate the "Pet Supply Deep Cleaning" on the App.

Elevate Smart Living with Matter Protocol

Embrace the power of Matter standard through the Roborock Qrevo Slim, leading you to boundless smart home possibilities. Say goodbye to the frustrations of limited compatibility as you effortlessly take control of your robot vacuum and other compatible devices. Discover the true convenience of a fully integrated smart home.

*The Matter protocol will be available on Roborock Qrevo Slim through an upcoming OTA. Please stay informed for the latest updates.
