You power it.

Your KONA Electric means that enjoying all the style, versatility and fun of a compact SUV gets a new dimension: electric driving with no compromises. Choosing Genuine Accessories will maximise your enjoyment and flexibility.

You connect it.

Charging your KONA Electric could not be easier, smarter and faster. The high-quality Charging cable, Mode 3 is designed and engineered to function faultlessly and to withstand rough handling and extreme climatic conditions.

Charging cable, Mode 3

Charging cable, Mode 3
To maximise its full capabilities the Charging cable, Mode 3 is equipped with Type 2 plugs at both ends. The electrical contacts are made from solid metal, and the easy-to-use plug handles are designed to safely and slowly dissipate any heat build-up during charging. High-grade materials make this charging cable extremely resistant to severe twisting or bending. And extensive weatherproofing excludes the possibility of corrosion. Secure automatic locking to both the car and the charging point is provided by the Type 2 plugs. The Charging cable, Mode 3 can be used for the day-to-day charging at public and domestic charging points that provide Type 2 sockets with up to 22 kW.

You charge it.

For faster and more efficient charging, also at public charging points, the Mode 3 cable radically reduces the time required to replenish the car's batteries.

Mode 3

Charging Mode 3 connects the electric vehicle with a dedicated electrical circuit via any AC charging point equipped with a Type 2 socket. Active communication between the charging point and the car is established to monitor charging point capacity, safety earthing integrity and the selection of the charging rate. It allows the car to turn off the power when its battery is fully charged. The improved communication and the higher charging current enable a faster and safer charging performance.

Type-2 plug

Now adopted as the European standard in connection with electric vehicle charging, the Type 2 plug incorporates a unique, single- or three-phase pin arrangement that facilitates three different functions: power transmission, safety earthing and system communication. The majority of public charging points are equipped with Type 2 power sockets and combined with the single-phase Charging cable, Mode 3 provides the maximal possible charging speed for the KONA Electric.
