Knauf Gypsum Phils, Inc.

About Knauf and Knauf Academy

ABOUT KNAUF

Founded in 1932, Knauf is one of the world's leading manufacturers of construction materials for interior design, building insulation, and design ceilings. Knauf plants across the globe produce state-of-the-art drywall systems, plasters, and insulating materials as well as external thermal insulation composite systems. Moreover, paints, flowing screeds and flooring-systems, as well as machines and tools for the application of these products round off our portfolio. The Knauf Group invests substantially each year in the development and modernisation of manufacturing plants, and the training and further education of its employees.

The Knauf Group continues to operate as a family business and is present in over 90 countries with over 80 raw materials processing plants and over 300 manufacturing plants on five continents. Knauf systems simplify planning and construction on a global scale, offering comprehensive solutions and quality assurance. In many countries, the name Knauf is synonymous with gypsum. The Group is managed by the general partners Alexander Knauf, Jörg Kampmeyer, and Dr Uwe Knotzer. In 2021, Knauf employed 40,000 employees worldwide and generated sales of 12.6 billion Euros.

ABOUT KNAUF ACADEMY

The increasing demand for skilled workers in the Philippine construction industry became more evident during the COVID pandemic. Knauf Gypsum Philippines, Inc. wants to do its share to fill the gap through the Knauf Academy, a develoPPP Project that is co-financed by DEG from the public funds of the German Federal Ministry for Economic Cooperation and Development. The Knauf Academy aims to improve the technical qualifications and employability of skilled workers and students in the field of drywall construction. It establishes a formal learning system that will lead to more capable installers and better craftmanship on project sites. The training modules will equip learners on both theoretical knowledge and practical skills of interior wall and ceiling system installations to help secure employment in their respective careers in the construction industry.

STANDARD DRYWALL AND CEILING INSTALLATION

Standard Drywall and Concealed Ceiling Installation Training is a 16-hour session that aims to instill the fundamental knowledge and skills of gypsum board installation according to the approved manufacturer's methodology.

Learning Objectives:

- Be oriented with the basic safety protocols
- Determine the different types of gypsum boards and their proper applications
- Be familiar with components of a standard drywall partition and ceiling system
- Understand the methodology of drywall and ceiling installation, detail connections, and techniques
- Learn the fast & easy way to repair gypsum boards
- Avoid damages and wastages through proper gypsum board handling and storage

Who should attend:

Open to all aspiring drywall & ceiling installers who want to upskills their knowledge and skills in gypsum board installation. Interested architects, engineers, interior designers, students, and other partners in the construction industry are also welcome to join.

Training Duration: 16 h

Module 1

Introduction to Gypsum Board

- History of Gypsum Board
- Gypsum Board Production Process
- Benefits of Using Gypsum Board
- Types of Gypsum Board
- Gypsum Board Handling and Stocking
- Gypsum Board Repair
- Cutting of Gypsum Board

Module 2 & 3

Standard Partition & Concealed Ceiling System Installation

- Drywall Introduction
- Studs Layout
- Standard Partition Components
- Tools
- Installation Procedure
- Screws
- Opening Details
- Detail Connections
- Practical Training Instruction
- Practical Training Actual

Module 4

Taping and Jointing

- Taping and Jointing Introduction
- Jointing Products
- Level of Finishes
- Tools
- Do's and Don'ts in Jointing
- Application Procedure
- Finishing Level 4 Joint Deviations and Checking
- Practical Training Actual

OTHER COURSES AVAILABLE:

- Staggered Partition System Installation
- Curve Partition and Ceiling System Installation
- Wall Lining System Installation
- Bulkhead Ceiling System Installation
- Fire Rated Drywall and Ceiling System Installation
- Bulkhead Ceiling System Installation
