

**MANN
FILTER**

Our Product. Your Solution.

Main European Applications for Trucks and Buses

**MANN
FILTER**

MANN-FILTER - Perfect parts. Perfect service.

Product Portfolio

In addition to air, oil, fuel and cabin filters, our portfolio also includes special products for a complete line, far beyond the conventional!

Special Applications

Scan the below QR code to see our range of air dryers, centrifugal filters, coolant filters, hydraulic filters and urea filters:

Discover the filters installed in the truck:

- 1 Air filter primary element
- 2 Air filter secondary element
- 3 Engine oil filter
- 4 Fuel filter element
- 5 Fuel filter / water-separator
- 6 Hydraulic filter
- 7 Urea filter
- 8 Air dryer filter
- 9 Hydraulic transmission filter
- 10 Centrifugal filter
- 11 Cabin air filter

Remember to: Always change the oil filter and the other filters as well.

+ WHY MAKE THE CHANGE?

+ Clogged oil filter reduces the service life of the engine.

The saturated (clogged) filter allows circulation of dirty oil, shortening the lifespan of the engine and its components. That's why when changing the oil, also change the oil filter.

+ Dirty air filter increases fuel consumption.

The air filter protects the engine against ingress of dust and other particles. In addition, the dirty air filter increases fuel consumption and emission of pollutants.

+ Saturated fuel filter will cause engine to lose power or fail to start.

The fuel filter prevents dirt from entering the engine, clogging the injector unit or burning the fuel pump. That's why it is critical to check the filter regularly.

+ Clogged cabin air filter causes breathing problems.

The cabin air filter retains pollutants, dust and mites that cause severe breathing problems. That's why it has to be changed periodically.

WHY MANN-FILTER?

✓ The MANN-FILTER oil filter enhances the longevity of your engine.

Our MANN-FILTER filter media are built to meet the future-facing technical requirements of high-performance engines. We use a non-return membrane that keeps the engine oil in the filter as soon as the engine stops. This offers an optimized and even faster oil supply on start-up.

✓ The MANN-FILTER air filter improves engine performance and efficiency.

The MANN-FILTER air filter has unique papers, even folds and perfect sealing that protect the engine against ingress of dust.

✓ The MANN-FILTER fuel filter generates savings.

The MANN-FILTER fuel filter offers high performance and economy. With greater filtration capacity, it produces better engine performance.

✓ The MANN-FILTER cabin air filter protects health.

The MANN-FILTER cabin air filter retains the smallest particles of air dust, protecting health of the vehicle's occupant, in addition to eliminating unpleasant odors.

Applications

DAF

Model	Engine	Air		Oil		Fuel		Cabin		Air Dryer		Others	
65CF (1998-2000)	NS Series	C 25 950/1		W 962/8		WDK 940/5				TB 1364 x		Hydraulic steering	H 601/4
