MANN-FILTER – Perfect parts. Perfect service.

MANN-FILTER – always the right choice.

**Original
equipment
quality you
can trust!**

Whether mobile on construction sites or stationary in industrial plants, compressors must always deliver full power. Long running times, large volumes of dust and high mechanical loads place enormous demands on filtration systems. MANN-FILTER products in 100% original equipment quality offer the best protection for your compressor, providing long-term protection for your plant and therefore your investment.

Air filters

Reliable performance even in dusty working environments: MANN-FILTER air filters impress with their excellent filtration performance. They separate harmful dirt particles and water droplets from the intake air, thus reducing engine wear and extending its service life. Where technically possible, we use environmentally friendly, metal-free elements in our filters.

Oil filters

The exceptionally high particle separation and dirt holding capacity of MANN-FILTER oil filters ensure the best possible protection and enable long service intervals – even under the toughest operating conditions.

Fuel filters

MANN-FILTER fuel filters protect modern diesel injection systems against dirt particles and water droplets in the fuel. They reliably ensure that the engine is supplied with clean fuel – and thus contribute to extending its service life.

Hydraulic filters

In environments with high operating pressures, our filters protect the hydraulic system of your machines against dirt particles, corrosion and abrasion. The high dirt holding capacity of the medium ensures a long filter service life and even removes the finest harmful particles.

Air/oil separators

Whether in element or box form, MANN-FILTER air/oil separators ensure high separation rates and low quantities of residual oil. This minimizes oil loss. The low differential pressure delivers energy savings. This reduces operating costs and conserves resources.

The MANN-FILTER catalogue

A variety of new filter types for the latest passenger cars, trucks, and off-highway models complement the widest range of filters in original equipment quality. The catalogues offer an extensive range of vehicle and machine filter elements for the European spare parts market. The catalogues set is divided into four up-to-date yellow and green individual catalogues for different application areas and the "Comparison list" available in PDF format contains extensive conversion lists. For the first time, all catalogues are also available as interactive electronic PDF files for browsing with many quick access functions.

Ready for any project.

Rely on yellow and green when selecting filters.

Dust, long running times, high mechanical loads – these are the challenges that filtration solutions for compressors on construction sites and in industrial enterprises have to handle. MANN-FILTER products are made precisely for these requirements and offer the best protection for your compressors. The name MANN-FILTER stands for 100 % original equipment quality – and MANN+HUMMEL is a development partner to all major compressor manufacturers.

Quality that you can depend on

Reliable filtration chain: Air filters, oil filters, and air/oil separators are team players that interact with one another in a compressor. With high-performance MANN-FILTER filter elements, you can rely on a filtration chain in 100 % original equipment quality.

Service that impresses

Always in good hands – from ordering to support: High availability and fast delivery of our products come as standard – together with our comprehensive After Sales services. And with our state-of-the-art information tools including our website, online catalog, and print catalogs, you can find what you're looking for in no time at all.

A range that offers everything

Comprehensive and high-quality: MANN-FILTER offers you a complete range of air, oil, and fuel filters, as well as air/oil separators of the highest quality and durability for use in compressors from the most-important major manufacturers.

An investment that pays

Benefit in three ways: With high-quality products from MANN-FILTER, you comply with the service intervals prescribed by machine manufacturers, reduce machine downtimes, and ensure long term protection of your investment. Because long running times and optimum protection are not only good for your machine, but also for your budget.
