IntelliTAG™

Vibration and opening sensor that alerts BEFORE an intrusion occurs

THE INTELLITAG™ IN A NUTSHELL

The IntelliTAG™ anti-intrusion sensor adheres to all house openings: doors, windows, bay windows, etc. It analyzes and differentiates normal vibrations (wind, a ball, a visitor knocking at the door, etc.) from vibrations that indicate a break-in (caused by a crowbar, a mallet, etc.). In the event of an attempted forced entry, it triggers the alarm and notifies you on your smartphone BEFORE the intruder has entered the house.

ADVANTAGES

1. Dissuade burglars BEFORE a break-in

The Home Alarm detects break-in attempts and alerts you BEFORE an intrusion thanks to its IntelliTAG™ door and window sensors. These patented sensors analyze vibrations and send alerts (trigger the siren and send smartphone notifications) if a break-in attempt is proven to have occurred.

2. Quick and easy installation

Unlike other sensors on the market, the IntelliTAG™ is a one-piece device. The double-sided adhesive surface provided allows you to simply stick it on all the openings you want to protect: doors, windows, skylights, garage doors or even objects.

TECHNICAL SPECIFICATIONS

Product reference number	2401487
EAN code	3660849508517
Use	Indoor or outdoor (IP 54)
Power supply	1 AAA battery included (battery life: 1 year)
Radio range	Up to 200 m (in open air)
Security	• Tamper protection to prevent removal • Low battery information
Installation	Mounts with the double-sided adhesive included Automatically recognized by the hub
Operating temperature	Between 0°C and +45°C
Dimensions / Weight	60 x 28 x 13.5 mm / 28 g
Compatibility	Somfy One, One+, Home Alarm and Myfox Home Alarm
